Haq, ek behtar zindagi ka.

<b>Investment Objective</b>	<p>The investment objective of the scheme is to generate reasonable returns and reduce interest rate risk by investing in a portfolio comprising predominantly of floating rate instruments and fixed rate instruments swapped for floating rate returns. The Scheme may also invest a portion of its net assets in fixed rate debt securities and money market instruments.</p> <p>However there can be no assurance that the investment objective of the scheme will be achieved. The Scheme does not guarantee / indicate any returns.</p>			
<b>Type of Scheme</b>	<p>An open ended debt scheme predominantly investing in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps/derivatives)</p>			
<b>Asset Allocation Pattern of the scheme</b>	<b>Instruments</b>	<b>Indicative Allocation (% of total assets)</b>		<b>Risk Profile</b>
		<b>Minimum</b>	<b>Maximum</b>	
	Floating Rate Debt Securities (including Securitised Debt & Fixed Rate Debt Instruments swapped for floating rate returns)	65%	100%	Low to Medium
	Debt and Money Market Securities (including CBLO & Repo)	0%	35%	Low to Medium
	Units issued by REITs & InvITs	0%	10%	Medium to High
<p>Investments in securitised debt, if undertaken, shall not exceed 50% of the net assets of the Scheme.</p> <ol style="list-style-type: none"> <li>The scheme may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy. Total investments in debt, money market instruments, units of mutual fund schemes, and derivatives shall not exceed 100% of the net assets of the scheme. Subject to above conditions, the investment in derivative can be up to 50% of the net assets of the scheme.</li> <li>The Scheme will not invest in foreign securities. It will also not engage in Short Selling and Credit default swaps.</li> <li>The scheme may invest in repo in corporate debt securities and may engage in Securities Lending or such other transactions as may be allowed to Mutual Funds from time to time.</li> </ol> <p><b>Change in Investment Pattern:</b> The above investment pattern is only indicative and may be changed by the Fund Manager for a short term period on defensive considerations, keeping in view the market conditions, market opportunities, applicable SEBI (MF) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit holders. Rebalancing of the portfolio will be done when the asset allocation falls outside the range given above. If the exposure falls outside the above mentioned asset allocation pattern, it will be restored within 30 days. If owing to adverse market conditions or with the view to protect the interest of the investors, the fund manager is not able to rebalance the asset allocation within the above mentioned period of 30 days, the same shall be reported to the Internal Investment Committee. The Internal Investment Committee shall then decide the further course of action.</p> <p><b>Investment in units of REITs and InvITs</b> In terms of SEBI (Mutual Funds) (Amendment) Regulations, 2017 dated February 15, 2017 and SEBI Circular SEBI/HO/IMD/DF2/CIR/P/2017/17 dated February 28, 2017, Mutual funds can invest in the units of REITs &amp; InvITs subject to applicable investment limits.</p> <p>At the Mutual Fund level:-</p> <ol style="list-style-type: none"> <li>Not more than 10% of units issued by a single issuer of REIT and InvIT;</li> <li>At a single Mutual Fund scheme level: -             <ol style="list-style-type: none"> <li>not more than 10% of its NAV in the units of REIT and InvIT; and</li> <li>not more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.</li> </ol> </li> </ol> <p>Depending on the development of the market, the internal investment norms would be submitted to the Board of AMC for approval subsequently before making any investment in units of REITs/InvIT.</p> <p><b>Use of Interest Rate Futures (IRFs)</b> Additionally, in terms of SEBI Circular, SEBI/HO/IMD/DF2/CIR/P/2017/109 dated September 27, 2017, on 'Review of norms for participation in derivatives by Mutual Funds', it is proposed to use Interest Rate Futures (IRFs) for imperfect hedging against interest rate volatility by the scheme, subject to applicable investment limits. Some of the key points of circular are as follows:</p> <ol style="list-style-type: none"> <li>To reduce interest rate risk in a debt portfolio, the scheme may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below: <math display="block">\frac{(\text{Portfolio Modified Duration} * \text{Market Value of the Portfolio})}{(\text{Futures Modified Duration} * \text{Futures Price} / \text{Par Value})}</math></li> <li>At no point of time, the net modified duration of part of the portfolio being hedged shall be negative.</li> <li>In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.</li> <li>Imperfect hedging using IRFs will be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to certain conditions such as exposure to IRFs is created only for hedging, the correlation between the portfolio and the IRF is atleast 0.9 etc. as prescribed in above mentioned SEBI circular.</li> </ol> <p><b>Investment in Repo in Corporate Debt Securities</b> The scheme shall participate in repo transactions in Corporate Debt Securities within the following overall framework, in line with SEBI circular dated November 11, 2011 and policy approved by the Boards of UTI AMC Ltd &amp; UTI Trustee Co P Ltd.</p>				

	<p><b>Gross Exposure Norms:</b></p> <ul style="list-style-type: none"> <li>(i) The gross exposure of any scheme to 'corporate bonds repo transactions' shall not be more than 10% of the net assets of the concerned scheme.</li> <li>(ii) The cumulative gross exposure through 'corporate bonds repo transactions' along with debt and derivatives shall not exceed 100% of the net assets of the scheme.</li> <li>(iii) In addition to investment restrictions specified in SEBI (Mutual Funds) Regulations 1996, the counter-party exposure in a scheme, considering the investments held in the debt securities and value of collaterals held through repo transactions (as a lender), shall not be more than 30% in case of money market instruments (20% in other cases).</li> </ul>
<p><b>Risk Profile of the Scheme</b></p>	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p>UTI Floater Fund is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects or returns. There may be instances when no dividend distribution could be made.</p> <p><b>Any safety net or guarantee provided: UTI Floater Fund is not a guaranteed or assured return scheme.</b></p> <p><b>Scheme Specific Risk Factors</b></p> <p><b>Risk factors associated with investing in Fixed Income Securities</b></p> <ul style="list-style-type: none"> <li>(a) Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Investments in corporate debt carry a higher level of risk than investments in Government securities. Further even among corporate debt, AAA/P1+ rated instruments are comparatively less risky than AA/P1 rated instruments. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern.</li> <li>(b) The Net Asset Value (NAV) of the Scheme will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. While the change in interest rate will affect the debt instruments in general, the effect of it on floating instruments will be generally less than that of fixed rate instruments and limited upto the period of resetting of interest rates.</li> <li>(c) Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.</li> <li>(d) Investment in Corporate Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values.</li> <li>(e) The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.</li> <li>(f) As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.</li> <li>(g) Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Schemes may not obtain any return on its investment.</li> <li>(h) Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive yields. This may increase the risk of the portfolio.</li> <li>(i) While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.</li> <li>(j) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.</li> <li>(k) As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under 'Right to Limit Redemptions' in Section 'Special Considerations', if any, on the right to freely retain or dispose of units being offered in the Scheme Information Document.</li> <li>(l) At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme.</li> </ul>

	<p>(m) The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.</p> <p>(n) Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.</p> <p>(o) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p> <p>(p) Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.</p> <p>(q) Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.</p>

The term FFI is defined widely to cover a large number of non-US based financial service providers such as mutual funds, depository participants, brokers, custodians as well as banks.
